PROJECT FACT SHEET

Customer: AUSTRALAND

Project: Coles Queensland Chilled Distribution Centre Expansion

Project Profile:

In late 2011 Nilsen were awarded the contract to expand the existing facility, creating a new -25°C freezer chamber, +14°C produce chamber, Banana Ripening Rooms, operational offices and amenities. The second contract also included the conversion of the existing freezer chamber into +2°C chilled chamber, two produce chambers and a new at-grade loading dock with awning over.

Specifically, the **Expansion project** scope included:

- Site Temps (12 Boards)
- New Main Switchboard
- Communications and Data Package
- General Light and Power
- Security Package
- Upgrade of the existing back up power generation system
- Wiring of new BMS point
- Upgrade of the existing Lightning Protection System

The project was successfully completed and handed over to managing contractor Australand in September 2012.
